

oikos Lüneburg

chapter in accession

students for sustainable
economics and management

Represented by

Joscha Enger / Anja Zirngibl

Studying at Leuphana

Fertile ground for student engagement

- Philosophy: humanistic and sustainability oriented
- Leuphana Semester: interdisciplinary studies including sustainability

Lots of possibilities & support for engagement:

- Curriculum development in the „Komplementärstudium“
- Project Funding
- Coaching and advise from experts
- Familiar atmosphere, good personal contact

High diversity of students initiatives

Impressions

Where at your University can you start a project?

Energy Supply &
Consumption

Lectures

Cafeteria

Waste
Management

Sports & Events

Design your own project

Think of a project you can start to promote sustainability at your University

You might consider the following aspects:

- What is your general idea?
- What are your main goals?
- Who can you work with/who can help you?
- Who is your target group?
- What kind of support do you need?
- What are your first steps to realize it?
