

Sustainability field trip to the old Hanseatic city of Lüneburg in Lower Saxony, Germany

9-14 June 2013

The Charles University Environment Center invites Czech students studying (any academic discipline) at the Bachelor's level at a university outside Prague to enrol on its six-day field trip to the beautiful university town of Lüneburg to study how 'sustainability' is applied in theory and in practice in the German context.

Den 6: Discussion with PhD students about the Leuphana Innovation Incubator; return to Prague

The trip is fully funded for Czech students, including **transport, accommodation and meals**; a small returnable bond, however, will be charged for all successful applicants. The only requirements are a good knowledge of English and an eagerness to learn more about sustainability. Some written work will be required of students which will be worth 2 ECTS.

There are a limited number of places on the field trip, so be sure to apply early [via this link](#).

For more information, go to <http://mosur.czp.cuni.cz/index.php/en/> or look for MOSUR Sustainability Field Trips on [Facebook](#).

If you have any questions, contact Andrew Barton at andrew.barton@czp.cuni.cz

The field trip is run as part of the MOSUR project and with the assistance of our partner, Leuphana University of Lüneburg.

Indicative programme:

Day 1: Departure from Prague by bus.

Day 2: *Sustainable Campus & Sustainability* in the Leuphana University of Lüneburg Curriculum

Day 3: 100% Renewable Energy for Lüneburg & visit to Hamburg

Day 4: Visits to the Alfred Toepfer Academy for Nature Conservation & Baukhof organic agriculture in Amelinghausen

Day 5: German Green Party politics; environmental education; visit to Biosphaerium Elbtaale
